One Step Ahead: Fiori 3.0

A complete end to end support with UX harmonization.

CONVERSATIONAL

Technology has gone a long way and everything is up end running with Atrificial intelligence which is major missing in 2.0

CONVERSATIONAL

This has a chatbot based AI, which scales the experience of user to efficiently manage their end to end processes.

CONSISTENCY

Users have to juggle between different product in different system

CONSISTENCY

Fiori 3.0 apps will look consistent, and a user will feel working in unified system of different products

SIMPLICITY

Fiori 2.0 restricts the user with limited content as they were displayed using tiles

SIMPLICITY

Tiles is been changed to cards which guarantees more content for end users, business functions and shell bar.

SCALABLE CONTENT

Enormous amount of functionalities were placed in one screen and retrive manually, which questions the fact of user friendly interface

SCALABLE CONTENT

The point of simplicity is been established with the help of Co-pilot, which enables exchange not only text messages but also pictures or files.
